In the 14th edition the tributary length,  $p$  is taken as  $2b$  (45 deg angle). In the 15th edition it is taken as  $3.5b$  (or even larger). I don't know how many subtle changes like this may have been made, and rather go through and try to find them all, I decided to go with the 14th edition (although I did not need to purchase a new one).

## **What's New?**

AISC's codes (not the manual) are free to download and their advice is also free. The discussion is about the difference between the 13th (2005) and 14th (2010) editions. Their aren't huge changes between the two.

there is a 14th edition now. However, this manual is still an excellent reference for practicing engineers. I got it some time ago. It contains both LRFD and ASD design guidelines; I use the ASD once and a while to check work from other engineers. However, the book is intended for LRFD mainly, and the charts are great.
