The Ultimate Guide to Brain Breaks

The caliper guide pins are two round metal pins on each brake caliper where the brake piston assembly sits. They're called guide pins because they're responsible for guiding the proper angle for how the brake pad meets the rotor. On the next page, we'll explore how to determine whether or not your brake caliper guide pins are causing problems, and explain how to fix them if they are.

How to Test Brake Caliper Guide Pins | HowStuffWorks

This is a quick and easy challenge to reset the brain. Instruct kids to touch their left ear with their right hand and at the same time touch their nose with their left hand. Then have them switch their hands and touch their right ear with their left hand and their nose with their right hand. Switch back and forth a few times.

Calipers - Brake Parts Inc

For example, I would never call one disc brake caliper "calipers" (and neither would any mechanic [as far as my regional knowledge knew when I wrote this —Ed.]). But when thinking about my dial caliper, my brain actually feels both senses of the word at various times. And you could use either sense when talking to a fellow machinist and s/he ...
