### Oracle Java Technologies | Oracle

Please note that this page only applies to JDK 7 and earlier releases. For JDK 8 please see the Windows, Solaris reference pages.. This document provides information on typical command-line options and environment variables that can affect the performance characteristics of the Java HotSpot Virtual Machine.

### Java HotSpot VM Options - Oracle

Java analysis supports analysis of Thymeleaf and JSP views when used with Java Servlets or Spring. To benefit from this analysis you need to make your views part of the project sources using sonar.sources property. In practice this usually means adding the following in your Maven pom.xml file

### Java - SonarQube Documentation | SonarQube Docs

AsyncOptions: control over the generation of sync, async & promise method variants. As of release 0.4.5 it became possible to create async methods that return promises by setting the asyncOptions property of the java object. With release 0.4.7 this feature is extended to allow changing the suffix assigned for sync and async method variants, and to further configure this module to optionally ...
