In case your device connects via Ethernet, you must supply the IP address and port. You are also given the option to choose between raw TCP access and using the VXI protocol. VXI is an industry standard which is mainly used in professional equipment and the device will most likely let you know that it supports VXI.

#### PulseView User Manual - sigrok

Updated: 9/20. This page is intended to be a reference list of basic specifications for electronic test equipment, especially obsolete models. I have been collecting this information for about 25 years, starting with a well thumbed Tucker Electronics catalog, and then adding listings from other catalogs, other web sites, and of course eBay listings. I am not a test equipment dealer and in ...
