For one activity, the preservice teachers use an interactive mathematics computer environment as an electronic textbook. Embedded in the text is the derivation, using calculus, of the velocity of an object under the influence of earth's gravity as a function of time (i.e.,  $v(t) = gt + v_0$ ). Through this interactive environment preservice teachers manipulate parameters and see, in real time, the effects of those changes on the graphs and data tables of the function.
